While Carol Deck's letter of the 22d has evasion in it I do not know that she intends evading and there is nothing I can do if she lies.

If she is telling the truth her conduct is ever less comprehensible.

There is such a thing as an original disk and she knows very well that she made and gave me a duplicate of the origibal to begin with.

If the disks I finally got are complete, and only after Dennis has a chance to try to find out, can we know, at this point nothing else really matters.
